

INFORMATION SECURITY POLICY

In accordance with the TS ISO/IEC 27001 Information security management systems standard of our activities regarding flight operation information systems and industrial control systems;

- ✓ To manage information assets, to determine the security values, needs and risks of assets, to develop and implement controls for security risks,
- ✓ Defining the framework for the methods to be determined to determine the frequency of threats to information assets, values, security needs, vulnerabilities and assets,
- ✓ Defining a framework for assessing the confidentiality, integrity and accessibility impacts of threats on assets,
- ✓ To set out the working principles for handling risks,
- ✓ Continuously monitoring risks by reviewing technological expectations in the context of the scope of service,
- ✓ To ensure information security requirements arising from the national or international regulations to which it is subject, to fulfil legal and relevant regulatory requirements, to meet its obligations arising from agreements, and its corporate responsibilities towards internal and external stakeholders,
- ✓ To reduce the impact of information security threats to service continuity and contribute to continuity,
- ✓ To have the competence to quickly intervene in information security incidents that may occur and to minimize the impact of the incident,
- ✓ To maintain and improve the information security level over time with a cost-effective control infrastructure,
- ✓ Improving corporate reputation and protecting it from negative effects based on information security,
- ✓ To ensuring the continuity of the Information Security Management System,
- ✓ To continuously improve the Information Security Management System in accordance with international standards,
- ✓ To determine the necessary information security duties and responsibilities, to provide the necessary resources and to make relevant appointments,
- ✓ Taking into account exceptional and out-of-scope activities in the operation of the Information Security Management System,
- ✓ Within the scope of SOME, protecting information security within the airport and managing incidents,
- ✓ To meet all responsibilities regarding the processing, protection and destruction of personal information of employees, passengers, visitors, suppliers, business partners and third parties within the scope of the Personal Data Protection Law No. 6698 (K.V.K.K) and other relevant legislation;

we are committed.
