

ENVIRONMENT POLICY

As IC İctaş Zafer International Airport Investment and Operation Inc., we aim to protect natural resources while fulfilling our environmental, social, and humanitarian responsibilities in line with the United Nations Sustainable Development Principles, to which we are committed, in all services and activities we carry out through our corporate and social partnerships within the scope of airport and terminal management. In achieving this;

- ✓ We will ensure compliance with and follow up on all legal regulations regarding the environment and all conditions for which we have accepted responsibility,
- ✓ In order to minimize our environmental impact, we will use resources efficiently to reduce waste, and take measures to conserve energy and water,
- ✓ By acting respectfully, protectively, and consciously towards all elements of the ecosystem, we will contribute to the continued existence of all living forms,
- ✓ By continuously evaluating the environmental aspects and impacts of all processes, from the purchase of materials to be supplied to their delivery to firms licensed by the Ministry of Environment, Urbanization and Climate Change, and by ensuring that any non-conformities are rectified and improvement opportunities are identified, contribution will be made to sustainable consumption,
- ✓ To minimize our impact on climate change, we will carry out activities that reduce fossil fuel consumption, which is a direct cause of global warming and climate change.
- ✓ By setting department-based targets to reduce our corporate and sectoral carbon footprint and implementing alternative methods that include emissions from third parties, we aim to move towards a low-carbon economy and minimize our environmental impact with a net-zero emissions vision,
- ✓ To achieve common environmental goals by working in cooperation with all our stakeholders, subcontractors, suppliers, local community, NGOs and government agencies,
- ✓ To reduce our water consumption by selecting plant species suitable for regional conditions and requiring little water in landscaping applications, to prevent natural disasters such as erosion and floods, and to create a livable external environment with minimal intervention in natural conditions,
- ✓ To continuously improve our environmental performance by making emergency preparedness a part of our operations to minimize the environmental impacts that may arise from our activities,
- ✓ To raise the awareness of our employees regarding environmental and sustainability responsibilities, to conduct necessary training and to encourage their participation,

we are committed.
